

## INDEX TO VOLUME 139

## Alphabetical Table of Contents of Authors

- ALBERTS, ALLISON C. Constraints on the design of chemical communication systems in terrestrial vertebrates, S62
- ANDERSON, H. M., V. HUTSON, and R. LAW. On the conditions for permanence of species in ecological communities, 663
- ASKEW, R. R. See BRADFORD A. HAWKINS
- BARTON, ANDREW M. See DEBORAH E. GOLDBERG
- BEACHY, CHRISTOPHER KING, and RICHARD C. BRUCE. Lunglessness in plethodontid salamanders is consistent with the hypothesis of a mountain stream origin: a response to Ruben and Boucot, 839
- BEGON, MICHAEL, ROGER G. BOWERS, NIKOS KADIANAKIS, and DAVID E. HODGKINSON. Disease and community structure: the importance of host self-regulation in a host-host-pathogen model, 1131
- BELLE, CHRISTIAN. See PHILIPPE JARNE
- BERGELSON, JOY, and MICHAEL J. CRAWLEY. Herbivory and *Ipomopsis aggregata*: the disadvantages of being eaten, 870
- BIRKHEAD, T. R. See A. P. MØLLER
- BLANCKENHORN, WOLF U., and THOMAS CARACO. Social subordination and a resource queue, 442
- BLUMSTEIN, DANIEL T. See AMOS BOUSKILA
- BOUSKILA, AMOS, and DANIEL T. BLUMSTEIN. Rules of thumb for predation hazard assessment: predictions from a dynamic model, 161
- BOWERS, ROGER G. See MICHAEL BEGON
- BROWN, CHARLES R., MARY BOMBERGER BROWN, and ANTHONY R. IVES. Nest placement relative to food and its influence on the evolution of avian coloniality, 205
- BROWN, MARY BOMBERGER. See CHARLES R. BROWN
- BRUCE, RICHARD C. See CHRISTOPHER KING BEACHY
- CAMPBELL, DIANE R., and JAMES L. DOOLEY. The spatial scale of genetic differentiation in a hummingbird-pollinated plant: comparison with models of isolation by distance, 735
- CARACO, THOMAS. See WOLF U. BLANCKENHORN
- CARTER, J. H. III. See JEFFREY R. WALTERS
- CASE, TED J. See RANDALL T. RYTI
- CHARNOV, ERIC L. See RICHARD SHINE
- CLARK, COLIN W., and C. DREW HARVELL. Inducible defenses and the allocation of resources: a minimal model, 521
- CRAWLEY, MICHAEL J. See JOY BERGELSON
- CROZIER, R. H. The genetic evolution of flexible strategies, 218
- DE JONG, G., and A. J. VAN NOORDWIJK. Acquisition and allocation of resources: genetic (co)variances, selection, and life histories, 749
- DELAY, BERNARD. See PHILIPPE JARNE
- DE ROOS, A. M., O. DIEKMANN, and J. A. J. METZ. Studying the dynamics of structured population models: a versatile technique and its application to *Daphnia*, 123
- DICKE, URSULA. See GERHARD ROTH
- DIEKMANN, O. See A. M. DE ROOS
- DION, JEROME. See BILL SHIPLEY
- DOERR, PHILLIP D. See JEFFREY R. WALTERS
- DOOLEY, JAMES L. See DIANE R. CAMPBELL
- DUGATKIN, LEE ALAN. Sexual selection and imitation: females copy the mate choice of others, 1384
- DUNHAM, ARTHUR E. See DONALD B. MILES
- EBENMAN, BO. Evolution in organisms that change their niches during the life cycle, 990

- ENDLER, JOHN A. Introduction to the symposium, S1
- . Signals, signal conditions, and the direction of evolution, S125
- ESHEL, ILAN. See CARLO MATESSI
- FINCKE, OLA M. Interspecific competition for tree holes: consequences for mating systems and coexistence in Neotropical damselflies, 80
- FINOT, LUC. See PHILIPPE JARNE
- FLEISHMAN, LEO J. The influence of the sensory system and the environment on motion patterns in the visual displays of anoline lizards and other vertebrates, S36
- FOLSTAD, IVAR, and ANDREW JOHN KARTER. Parasites, bright males, and the immunocompetence handicap, 603
- FRANCE, ROBERT. The North American latitudinal gradient in species richness and geographical range of freshwater crayfish and amphipods, 342
- FRUMHOFF, PETER C., and PHILIP S. WARD. Individual-level selection, colony-level selection, and the association between polygyny and worker monomorphism in ants, 559
- GABRIEL, WILFRIED. See BARBARA E. TAYLOR
- GAYLEY, TODD W. See RICHARD E. MICHOD
- GEORGE, T. LUKE. See C. RICHARD TRACY
- GLEESON, SCOTT K., and DAVID TILMAN. Plant allocation and the multiple limitation hypothesis, 1322
- GOLDBERG, DEBORAH E., and ANDREW M. BARTON. Patterns and consequences of interspecific competition in natural communities: a review of field experiments with plants, 771
- GOUYON, PIERRE-HENRI. See IRÈNE TILL-BOTTRAUD
- GRASSLE, J. FREDERICK, and NANCY J. MACIOLEK. Deep-sea species richness: regional and local diversity estimates from quantitative bottom samples, 313
- GREENE, D. F., and E. A. JOHNSON. Can the variation in samara mass and terminal velocity on an individual plant affect the distribution of dispersal distances? 825
- GRENFELL, B. T. Parasitism and the dynamics of ungulate grazing systems, 907
- GROSS, PAUL. See BRADFORD A. HAWKINS
- HANSKI, ILKKA. Inferences from ecological incidence functions, 657
- HARVELL, C. DREW. See COLIN W. CLARK
- HARVEY, HAROLD H. See DONALD A. JACKSON
- HAWKINS, BRADFORD A., and PAUL GROSS. Species richness and population limitation in insect parasitoid-host systems, 417
- HAWKINS, BRADFORD A., MARK R. SHAW, and R. R. ASKEW. Relations among assemblage size, host specialization, and climatic variability in North American parasitoid communities, 58
- HEARD, DOUGLAS C. The effect of wolf predation and snow cover on musk-ox group size, 190
- HODGKINSON, DAVID E. See MICHAEL BEGON
- HOOGLAND, JOHN L. Levels of inbreeding among prairie dogs, 591
- HUTSON, V. See H. M. ANDERSON
- INNES, S. See P. YODZIS
- IVES, ANTHONY R. See CHARLES R. BROWN
- JACKSON, DONALD A., KEITH M. SOMERS, and HAROLD H. HARVEY. Null models and fish communities: evidence of nonrandom patterns, 930
- JAENIKE, JOHN. Mycophagous *Drosophila* and their nematode parasites, 893
- JARNE, PHILIPPE, LUC FINOT, CHRISTIAN BELLEC, and BERNARD DELAY. Aphally versus euphally in self-fertile hermaphrodite snails from the species *Bulinus truncatus* (Pulmonata: Planorbidae), 424
- JOHNSON, E. A. See D. F. GREENE
- JUSTICE, KEITH E., and FELISA A. SMITH. A model of dietary fiber utilization by small mammalian herbivores, with empirical results for *Neotoma*, 398
- KADIANAKIS, NIKOS. See MICHAEL BEGON
- KARTER, ANDREW JOHN. See IVAR FOLSTAD
- KEDDY-HECTOR, ANNE. See MICHAEL J. RYAN
- LALONDE, R. G., and B. D. ROITBERG. On the evolution of masting behavior in trees: predation or weather? 1293
- LATHAM, ROGER EARL. See ROBERT E. RICKLEFS
- LAW, R. See H. M. ANDERSON
- LIBERG, OLOF. See MIKAEL SANDELL

- LONG, MICHAEL J. See MARK REES
- LUTNESKY, MARVIN M. F. A temporal-threshold model of polygynous mating in cyclical environments, 1102
- LYNCH, CAROL BECKER. Clinal variation in cold adaptation in *Mus domesticus*: verification of predictions from laboratory populations, 1219
- MACIOLEK, NANCY J. See J. FREDERICK GRASSLE
- MARTINEZ, NEO D. Constant connectance in community food webs, 1208
- MATESSI, CARLO, and ILAN ESHEL. Sex ratio in the social Hymenoptera: a population-genetics study of long-term evolution, 276
- METZ, J. A. J. See A. M. DE ROOS
- MICHOD, RICHARD E., and TODD W. GAYLEY. Masking of mutations and the evolution of sex, 706
- MILES, DONALD B., and ARTHUR E. DUNHAM. Comparative analyses of phylogenetic effects in the life-history patterns of iguanid reptiles, 848
- MILNE, BRUCE T. Spatial aggregation and neutral models in fractal landscapes, 32
- MØLLER, ANDERS PAPE. Frequency of female copulations with multiple males and sexual selection, 1089
- MØLLER, A. P., and T. R. BIRKHEAD. A pairwise comparative method as illustrated by copulation frequency in birds, 644
- MONGOLD, JUDITH A. Theoretical implications for the evolution of postsegregational killing by bacterial plasmids, 677
- MORAN, NANCY A. The evolutionary maintenance of alternative phenotypes, 971
- MORGAN, MARTIN T. The evolution of traits influencing male and female fertility in outcrossing plants, 1022
- MORRIS, MOLLY R. See MICHAEL J. RYAN
- NAIMAN, ROBERT J. See JOHN PASTOR
- NARINS, PETER M. Evolution of anuran chorus behavior: neural and behavioral constraints, S90
- NG, D. See M. C. SINGER
- NILES, JENNIFER. See JOHANNA SCHMITT
- NISHIKAWA, KIISA. See GERHARD ROTH
- PALMER, MICHAEL W. The coexistence of species in fractal landscapes, 375
- PARKER, G. A. Marginal value theorem with exploitation time costs: diet, sperm reserves, and optimal copula duration in dung flies, 1237
- PASTOR, JOHN, and ROBERT J. NAIMAN. Selective foraging and ecosystem processes in boreal forests, 690
- PEASE, CRAIG M. See MICHAEL J. RYAN
- PERKINS, ANJEANETTE L. See GEORGE C. STEVENS
- PERRILL, STEPHEN A. See MICHAEL J. RYAN
- PERRIN, N. Optimal resource allocation and the marginal value of organs, 1344
- PIJANOWSKI, BRYAN C. A revision of Lack's brood reduction hypothesis, 1270
- QUELLER, DAVID C. Quantitative genetics, inclusive fitness, and group selection, 540
- REES, MARK, and MICHAEL J. LONG. Germination biology and the ecology of annual plants, 484
- RICKLEFS, ROBERT E., and ROGER EARL LATHAM. Intercontinental correlation of geographical ranges suggests stasis in ecological traits of relict genera of temperate perennial herbs, 1305
- ROBERTSON, RALEIGH J. See LINDA A. WHITTINGHAM
- ROITBERG, B. D. See R. G. LALONDE
- ROTH, GERHARD, URSULA DICKE, and KIISA NISHIKAWA. How do ontogeny, morphology, and physiology of sensory systems constrain and direct the evolution of amphibians? S105
- RYAN, MICHAEL J., and ANNE KEDDY-HECTOR. Directional patterns of female mate choice and the role of sensory biases, S4
- RYAN, MICHAEL J., CRAIG M. PEASE, and MOLLY R. MORRIS. A genetic polymorphism in the swordtail *Xiphophorus nigrensis*: testing the prediction of equal fitnesses, 21
- RYAN, MICHAEL J., STEPHEN A. PERRILL, and WALTER WILCZYNSKI. Auditory tuning and call frequency predict population-based mating preferences in the cricket frog, *Acris crepitans*, 1370
- RYTI, RANDALL T., and TED J. CASE. The role of neighborhood competition in the spacing and diversity of ant communities, 355

- SANDELL, MIKAEL, and OLOF LIBERG. Roamers and stayers: a model on male mating tactics and mating systems, 177
- SCHMITT, JOHANNA, JENNIFER NILES, and RENATA D. WULFF. Norms of reaction of seed traits to maternal environments in *Plantago lanceolata*, 451
- SCHNEIDER, DAVID C. Thinning and clearing of prey by predators, 148
- SCHOENER, THOMAS W., and DAVID A. SPILLER. Is extinction rate related to temporal variability in population size? an empirical answer for orb spiders, 1176
- SHAW, MARK R. See BRADFORD A. HAWKINS
- SHINE, RICHARD, and ERIC L. CHARNOV. Patterns of survival, growth, and maturation in snakes and lizards, 1257
- SHIPLEY, BILL, and JEROME DION. The allometry of seed production in herbaceous angiosperms, 467
- SIH, ANDREW. Prey uncertainty and the balancing of antipredator and feeding needs, 1052
- SINGER, M. C., D. NG, D. VASCO, and C. D. THOMAS. Rapidly evolving associations among oviposition preferences fail to constrain evolution of insect diet, 9
- SMITH, FELISA A. See KEITH E. JUSTICE
- SOMERS, KEITH M. See DONALD A. JACKSON
- SPILLER, DAVID A. See THOMAS W. SCHOENER
- SPITZE, KEN. Predator-mediated plasticity of prey life history and morphology: *Chaoborus americanus* predation on *Daphnia pulex*, 229
- STAMPS, J. A. Simultaneous versus sequential settlement in territorial species, 1070
- STEVENS, GEORGE C., and ANJEANETTE L. PERKINS. The branching habits and life history of woody plants, 267
- STONER, DOUGLAS S. Vertical distribution of a colonial ascidian on a coral reef: the roles of larval dispersal and life-history variation, 802
- TAYLOR, BARBARA E., and WILFRIED GABRIEL. To grow or not to grow: optimal resource allocation for *Daphnia*, 248
- TAYLOR, PETER D. See LINDA A. WHITTINGHAM
- THOMAS, C. D. See M. C. SINGER
- TILL-BOTTRAUD, IRÈNE, and PIERRE-HENRI GOUYON. Intra- versus interplant Batesian mimicry? a model on cyanogenesis and herbivory in clonal plants, 509
- TILMAN, DAVID. See SCOTT K. GLEESON
- TRACY, C. RICHARD, and T. LUKE GEORGE. On the determinants of extinction, 102
- VAIL, STEPHEN G. Selection for overcompensatory plant responses to herbivory: a mechanism for the evolution of plant-herbivore mutualism, 1
- VAN NOORDWIJK, A. J. See G. DE JONG
- VASCO, D. See M. C. SINGER
- VEIGA, JOSÉ P. Hatching asynchrony in the house sparrow: a test of the egg-viability hypothesis, 669
- WALTERS, JEFFREY R., PHILLIP D. DOERR, and J. H. CARTER III. Delayed dispersal and reproduction as a life-history tactic in cooperative breeders: fitness calculations from red-cockaded woodpeckers, 623
- WANG, ONA T. Experimental assessment of male attractiveness: female choice or Hobson's choice? 433
- WARD, PHILIP S. See PETER C. FRUMHOFF
- WARD, S. A. Assessing functional explanations of host-specificity, 883
- WEST-EBERHARD, MARY JANE. Genetics, epigenetics, and flexibility: a reply to Crozier, 224
- WHITLOCK, MICHAEL C. Nonequilibrium population structure in forked fungus beetles: extinction, colonization, and the genetic variance among populations, 952
- WHITTINGHAM, LINDA A., PETER D. TAYLOR, and RALEIGH J. ROBERTSON. Confidence of paternity and male parental care, 1115
- WILCZYNSKI, WALTER. See MICHAEL J. RYAN
- WULFF, RENATA D. See JOHANNA SCHMITT
- XIA, XUHUA. Uncertainty of paternity can select against paternal care, 1126
- YODZIS, P., and S. INNES. Body size and consumer-resource dynamics, 1151

# Alphabetical Table of Contents of Titles

- Acquisition and allocation of resources: genetic (co)variances, selection, and life histories. G. de Jong and A. J. van Noordwijk, 749
- The allometry of seed production in herbaceous angiosperms. Bill Shipley and Jerome Dion, 467
- Aphally versus euphally in self-fertile hermaphrodite snails from the species *Bulinus truncatus* (Pulmonata: Planorbidae). Philippe Jarne, Luc Finot, Christian Bellec, and Bernard Delay, 424
- Assessing functional explanations of host-specificity. S. A. Ward, 883
- Auditory tuning and call frequency predict population-based mating preferences in the cricket frog, *Acris crepitans*. Michael J. Ryan, Stephen A. Perrill, and Walter Wilczynski, 1370
- Body size and consumer-resource dynamics. P. Yodzis and S. Innes, 1151
- The branching habits and life history of woody plants. George C. Stevens and Anjeanette L. Perkins, 267
- Can the variation in samara mass and terminal velocity on an individual plant affect the distribution of dispersal distances? D. F. Greene and E. A. Johnson, 825
- Clinal variation in cold adaptation in *Mus domesticus*: verification of predictions from laboratory populations. Carol Becker Lynch, 1219
- The coexistence of species in fractal landscapes. Michael W. Palmer, 375
- Comparative analyses of phylogenetic effects in the life-history patterns of iguanid reptiles. Donald B. Miles and Arthur E. Dunham, 848
- Confidence of paternity and male parental care. Linda A. Whittingham, Peter D. Taylor, Raleigh J. Robertson, 1115
- Constant connectance in community food webs. Neo D. Martinez, 1208
- Constraints on the design of chemical communication systems in terrestrial vertebrates. Allison C. Alberts, S62
- Deep-sea species richness: regional and local diversity estimates from quantitative bottom samples. J. Frederick Grassle and Nancy J. Maciolek, 313
- Delayed dispersal and reproduction as a life history tactic in cooperative breeders: fitness calculations from red-cockaded woodpeckers. Jeffrey R. Walters, Phillip D. Doerr, and J. H. Carter III, 623
- Directional patterns of female mate choice and the role of sensory biases. Michael J. Ryan and Anne Keddy-Hector, S4
- Disease and community structure: the importance of host self-regulation in a host-host-parasitoid model. Michael Begon, Roger G. Bowers, Nikos Kadianakis, and David E. Hodgkinson, 1131
- The effect of wolf predation and snow cover on musk-ox group size. Douglas C. Heard, 190
- Evolution in organisms that change their niches during the life cycle. Bo Ebenman, 990
- Evolution of anuran chorus behavior: neural and behavioral constraints. Peter M. Narins, S90
- The evolution of traits influencing male and female fertility in outcrossing plants. Martin T. Morgan, 1022
- The evolutionary maintenance of alternative phenotypes. Nancy A. Moran, 971
- Experimental assessment of male attractiveness: female choice or Hobson's choice? Ona T. Wang, 433
- Frequency of female copulations with multiple males and sexual selection. Anders Pape Møller, 1089
- The genetic evolution of flexible strategies. R. H. Crozier, 218
- A genetic polymorphism in the swordtail *Xiphophorus nigrensis*: testing the prediction of equal fitnesses. Michael J. Ryan, Craig M. Pease, and Molly R. Morris, 21
- Genetics, epigenetics, and flexibility: a reply to Crozier. Mary Jane West-Eberhard, 224

- Germination biology and the ecology of annual plants. Mark Rees and Michael J. Long, 484
- Hatching asynchrony in the house sparrow: a test of the egg-viability hypothesis. José P. Veiga, 669
- Herbivory and *Ipomopsis aggregata*: the disadvantage of being eaten. Joy Bergelson and Michael J. Crawley, 870
- How do ontogeny, morphology, and physiology of sensory systems constrain and direct the evolution of amphibians? Gerhard Roth, Ursula Dicke, and Kiisa Nishikawa, S105
- Individual-level selection, colony-level selection, and the association between polygyny and worker monomorphism in ants. Peter C. Frumhoff and Philip S. Ward, 559
- Inducible defenses and the allocation of resources: a minimal model. Colin W. Clark and C. Drew Harvell, 521
- Inferences from ecological incidence functions. Ilkka Hanski, 657
- The influence of the sensory system and the environment on motion patterns in the visual displays of anoline lizards and other vertebrates. Leo J. Fleishman, S36
- Intercontinental correlation of geographical ranges suggests stasis in ecological traits of relict genera of temperate perennial herbs. Robert E. Ricklefs and Roger Earl Latham, 1305
- Interspecific competition for tree holes: consequences for mating systems and coexistence in Neotropical damselflies. Ola M. Fincke, 80
- Intra- versus interplant Batesian mimicry? a model on cyanogenesis and herbivory in clonal plants. Irène Till-Bottraud and Pierre-Henri Gouyon, 509
- Introduction to the symposium. John A. Endler, S1
- Is extinction rate related to temporal variability in population size? an empirical answer for orb spiders. Thomas W. Schoener and David A. Spiller, 1176
- Levels of inbreeding among prairie dogs. John L. Hoogland, 591
- Lunglessness in plethodontid salamanders is consistent with the hypothesis of a mountain stream origin: a response to Ruben and Boucot. Christopher King Beachy and Richard C. Bruce, 839
- Marginal value theorem with exploitation time costs: diet, sperm reserves, and optimal copula duration in dung flies. G. A. Parker, 1237
- Masking of mutations and the evolution of sex. Richard E. Michod and Todd W. Gayley, 706
- A model of dietary fiber utilization by small mammalian herbivores, with empirical results for *Neotoma*. Keith E. Justice and Felisa A. Smith, 398
- Mycophagous *Drosophila* and their nematode parasites. John Jaenike, 893
- Nest placement relative to food and its influence on the evolution of avian coloniality. Charles R. Brown, Mary Bomberger Brown, and Anthony R. Ives, 205
- Nonequilibrium population structure in forked fungus beetles: extinction, colonization, and the genetic variance among populations. Michael C. Whitlock, 952
- Norms of reaction of seed traits to maternal environments in *Plantago lanceolata*. Johanna Schmitt, Jennifer Niles, and Renata D. Wulff, 451
- The North American latitudinal gradient in species richness and geographical range of freshwater crayfish and amphipods. Robert France, 342
- Null models and fish communities: evidence of nonrandom patterns. Donald A. Jackson, Keith M. Somers, and Harold H. Harvey, 930
- On the conditions for permanence of species in ecological communities. H. M. Anderson, V. Hutson, and R. Law, 663
- On the determinants of extinction. C. Richard Tracy and T. Luke George, 102
- On the evolution of masting behavior in trees: predation or weather? R. G. Lalonde and B. D. Roitberg, 1293
- Optimal resource allocation and the marginal value of organs. N. Perrin, 1344

- A pairwise comparative method as illustrated by copulation frequency in birds. A. P. Møller and T. R. Birkhead, 644
- Parasites, bright males, and the immunocompetence handicap. Ivar Folstad and Andrew John Karter, 603
- Parasitism and the dynamics of ungulate grazing systems. B. T. Grenfell, 907
- Patterns and consequences of interspecific competition in natural communities: a review of field experiments with plants. Deborah E. Goldberg and Andrew M. Barton, 771
- Patterns of survival, growth, and maturation in snakes and lizards. Richard Shine and Eric L. Charnov, 1257
- Plant allocation and the multiple limitation hypothesis. Scott K. Gleeson and David Tilman, 1322
- Predator-mediated plasticity of prey life history and morphology: *Chaoborus americanus* predation on *Daphnia pulex*. Ken Spitz, 229
- Prey uncertainty and the balancing of anti-predator and feeding needs. Andrew Sih, 1052
- Quantitative genetics, inclusive fitness, and group selection. David C. Queller, 540
- Rapidly evolving associations among oviposition preferences fail to constrain evolution of insect diet. M. C. Singer, D. Ng, D. Vasco, and C. D. Thomas, 9
- Relations among assemblage size, host specialization, and climatic variability in North American parasitoid communities. Bradford A. Hawkins, Mark R. Shaw, and R. R. Askew, 58
- A revision of Lack's brood reduction hypothesis. Bryan C. Pijanowski, 1270
- Roamers and stayers: a model on male mating tactics and mating systems. Mikael Sandell and Olof Liberg, 177
- The role of neighborhood competition in the spacing and diversity of ant communities. Randall T. Ryti and Ted J. Case, 355
- Rules of thumb for predation hazard assessment: predictions from a dynamic model. Amos Bouskila and Daniel T. Blumstein, 161
- Selection for overcompensatory plant responses to herbivory: a mechanism for the evolution of plant-herbivore mutualism. Stephen G. Vail, 1
- Selective foraging and ecosystem processes in boreal forests. John Pastor and Robert J. Naiman, 690
- Sex ratio in the social Hymenoptera: a population-genetics study of long-term evolution. Carlo Matessi and Ilan Eschel, 276
- Sexual selection and imitation: females copy the mate choice of others. Lee Alan Dugatkin, 1384
- Signals, signal conditions, and the direction of evolution. John A. Endler, S125
- Simultaneous versus sequential settlement in territorial species. J. A. Stamps, 1070
- Social subordination and a resource queue. Wolf U. Blanckenhorn and Thomas Caraco, 442
- Spatial aggregation and neutral models in fractal landscapes. Bruce T. Milne, 32
- The spatial scale of genetic differentiation in a hummingbird-pollinated plant: comparison with models of isolation by distance. Diane R. Campbell and James L. Dooley, 735
- Species richness and population limitation in insect parasitoid-host systems. Bradford A. Hawkins and Paul Gross, 417
- Studying the dynamics of structured population models: a versatile technique and its application to *Daphnia*. A. M. De Roos, O. Diekmann, and J. A. J. Metz, 123
- A temporal-threshold model of polygynous mating in cyclical environments. Marvin M. F. Lutnesky, 1102
- Theoretical implications for the evolution of postsegregational killing by bacterial plasmids. Judith A. Mongold, 677
- Thinning and clearing of prey by predators. David C. Schneider, 148
- To grow or not to grow: optimal resource allocation for *Daphnia*. Barbara E. Taylor and Wilfried Gabriel, 248
- Uncertainty of paternity can select against paternal care. Xuhua Xia, 1126

- Vertical distribution of a colonial ascidian  
on a coral reef: the roles of larval dis-  
persal and life-history variation.  
Douglas S. Stoner, 802
